

## **COVID-19 INFORMATION – Checklist for all trips 2023**

### **Vaccination/Recovery status and entry requirements**

There is no longer an obligation to provide proof of a vaccination, recovery, or test certificate to travel with us. However, we recommend that you perform a self-test before departure. Furthermore, we recommend that you wear a medical face mask in public indoor areas on board and wherever safety distances cannot be maintained.

Nevertheless, due to dynamic developments, changes may still occur at short notice. In addition, different vaccination, registration, and testing obligations may be necessary before the outward and return journey to your destination country or countries. Therefore, please inform yourself in time about the currently valid safety and hygiene regulations at:

<https://www.se-tours.de/en/travel-information/information-corona-virus>

Please inform yourself at your responsible authority about the entry regulations of the individual travel countries.

### **Travel preparations:**

- Please read your travel documents carefully.
- Make sure to inform yourself about valid regulations for your journey (flight, train, bus). Plan extra time if necessary.
- We recommend that you always carry your vaccination certificate with you as a digital certificate – either as printed QR code or in one valid app.
- Please take enough medical face masks with you. Depending on local regulations, wearing a mask may also be necessary for the duration of an excursion. Our crew or guides will inform you on site.
- Always use the disinfectants provided on board.

We hope you enjoy your travel preparations and have a wonderful trip!

Your team from SE-Tours GmbH
